Subtitles on demand

AWESOME

100+ shows from all major producers
Show fisheye, pre-warped, flatscreen, 4K
Share the VR® - VR360 on the dome

DISCOVERY DOME & OPENSOURCE

Discovery Dome is now working with OpenSpace to create unique content and educational tools for portable dome customers (www.openspaceproject.com).

OpenSpace is open-source interactive data visualization software designed to visualize the entire known universe. Live use of OpenSpace in a dome requires a robust internet connection, a high-end laptop, and a trained operator/user.

We are partnering with the Houston Museum of Natural Science to create an interface that will allow the novice user to show pre-recorded video and easily trigger events in OpenSpace that can be played interspersed with live 3D full-dome experiences generated as the audience flies through or around the environment.

This interface is in development now and will be demonstrated at the 2025 NSTA, and piloted at HMNS and at portable dome systems around the world. We will create scenes in OpenSpace and test with audiences. Our best flyover videos will be available free to our customers.

FREE SHOWS

ePlanetarium has an extensive list of FREE shows that come bundled with the purchase of a Discovery Dome system.

- | | |
|-------------------------|-----------------------------------|
| Cosmology (Casper) | Journey to Mars (NASA) |
| Exoplanets (Casper) | Losing the Dark (Loch Ness) |
| Flight Adventures (CMI) | New Horizons (Hartnell) |
| Galaxies (Casper) | Saturn The Ring World (HMNS) |
| IBEX (Adler) | Voyage To Distant Worlds (Casper) |
| Incredible Sun (BRNO) | |

2K

- | | |
|--|--|
| Audio Universe * (ESO) | One Sky Project (NSF) |
| Dark (Scitech) | Out There (ESO) |
| Dark Matter Mystery * (Laupheim) | Phantom of the Universe * (ESO) |
| Distant Worlds Alien Life * (ESO) | Seeing! (Mirage3D) |
| Europe To The Stars (ESO) | The Sun Our Living Star (ESO) |
| Forward To The Moon (Fiske) | Sunstruck * (MISCI) |
| From Earth To The Universe (ESO) | Supermassive Black Holes * (ESO) |
| Hot And Energetic Universe (ESO) | Two Small Pieces Of Glass (ESO) |
| Journey To The Centre Of The Milky Way (ESO) | Unveiling The Invisible Universe * (ESO) |

2K/4K

If you are not a Discovery Dome customer, we do charge a format fee for the pre-warped versions of the free shows (the fisheye versions you can get from the original producers).

* The shows with an asterisk require a signed license.

RENTAL INFO AT EPLANETARIUM.COM

Many of our shows are available to rent on the streaming site FULLDOMEOnDemand.com for only \$30 for 3 days. This is an amazing bargain and a convenient way to access a variety of full-dome content on short notice for your audiences.

FULLDOMEOnDemand also supports mirror projection which means our customers have access to a wide variety of shows from other producers as well.

View all our shows in all available languages at youtube.com/user/eplanetarium/

"Your eclipse program became the program of choice for delivering 4th grade science objectives regarding the moon, because in my opinion, it was the pick of the litter. The fact that we saved, potentially, many thousands of dollars we might have spent on any of the several planetarium products out there is an added advantage."

WHY CHOOSE DISCOVERY DOME?

Our mission is to create and distribute affordable and accessible educational technologies to inspire, engage, and educate

- We have the largest selection of domes in sizes from 4m to 10m, including semipermanent domes.
- We have display software that is powerful but easy to learn and use.
- We are the only portable planetarium company that creates planetarium shows.
- We are the ONLY woman-owned planetarium company, perfect for your grant applications.
- We are the ONLY planetarium company owned by an Astronomy professor.
- We use our very thin profit margin to support public education events, such as giving workshops at teacher conferences (NSTA, CAST, SEEC, ESIP) and bringing the Discovery Dome to public events such as the "Astronomy Night on the Mall" each June and to Hispanic students in South Texas yearly.
- We gave away 30,000 pairs of eclipse glasses for the 2017 eclipse and gave away another 35,000 for the 2023 and 2024 eclipses.

ECLIPSE & MOON MISSION ANIMATIONS

We are pleased to offer 10 FREE full-dome **eclipse animations** which show views of solar and lunar eclipses as seen from various viewpoints. In addition we also feature animations about the **Apollo** and upcoming **Artemis** moon missions.

Visit our [Planetarium Animation Request Form](#) to get access to all of our free animations.

EXPLORE ALL OUR SHOWS

Get info on and watch all our available shows on our website:

www.eplanetarium.com/shows.php

Many of our shows are available in numerous foreign languages. We have over 20 languages represented so far and are always looking for new vocal translations to offer. Every show and language we offer can be sampled via our language support page:

www.eplanetarium.com/support_languages.php

ePlanetarium is also working hard to add foreign language subtitles to all our shows. A listing of all available subtitle languages we have so far is on our subtitle support page:

www.eplanetarium.com/support_subtitles.php
